

THE AMERICAS / BIG AND BLUFF AND CHANGING

★ POLITICAL NOTES ★

A Presidents' Man Might Run

HOUSTON — Former Secretary of State James A. Baker 3d is not ruling out a run for the White House.

"While I haven't decided I'm going to run, I haven't decided I'm not going to run," he said in an interview with the Houston Post. "I have to decide if that's what I want to do with a good portion of the rest of my life."

Mr. Baker, who will turn 64 this month, held top posts in three Republican administrations. He was White House chief of staff for both Ronald Reagan and George Bush. "I know better than most what's involved," he said.

Mr. Baker said he had spent a year "laying low" after moving back to his native Houston from Washington. Recently, he has criticized President Bill Clinton on foreign policy, crime, health care and the economy. He also has started making rounds of the country, helping Republicans raise money and possibly amassing some political chips of his own. (AP)

Hard-Boiled White House Fun

WASHINGTON — Thousands of children tramped across the White House lawn Monday to roll hard-boiled eggs and catch a glimpse of President Clinton and Hillary Rodham Clinton. They also got a chance to see the Easter bunny and hunt for colorful wooden eggs signed by the president and the first lady and hidden in straw. A few were signed by the first family's cat, Socks.

Preparations for the event began well before Mr. Clinton blew the whistle to start the Easter egg roll. "I woke up before dawn this morning," he told the crowd. "And when I got up just at dawn, I already saw the Easter bunnies out here walking around, plotting their strategies for the day and getting ready."

The Clintons were carrying on a tradition begun more than 180 years ago by President James Madison and his wife, Dolley. The egg roll was held at the Capitol in those days. President Rutherford B. Hayes and his wife, Lucy, moved it to the White House in 1878 and it has been held there ever since.

except during the two world wars. The White House said about 42,000 children participated last year and more were expected this year. (Reuters)

Can Ex-Senator Jump Line?

ROCKVILLE, Maryland — After three decades in public life, William E. Brock 3d is regarded as one of the most skilled politicians in the Republican Party. But his decision to run for the Senate from Maryland 17 years after serving as a senator from Tennessee has puzzled even his biggest admirers.

Of the many reasons put forth by his friends as to why Mr. Brock should not return to the fray of elective politics, this is the most persuasive: He would probably lose. Though he could make history as the first senator elected by popular vote from two different states, Democrats are already attacking him as a carpetbagger.

If he survives a handful of opponents in the September primary, Mr. Brock would face Senator Paul S. Sarbanes, a three-term Democratic incumbent who is considered by the national Republican Party to have a relatively secure seat.

Mr. Brock, who served from 1971 to 1977, acknowledges that he has few fond memories of the "poisonous atmosphere" that surrounded the Watergate scandal. "I think it's worse now than it was," he said. So why doesn't he go back and tend to his consulting firm, enjoy the millions he inherited from his family's candy fortune and spend time with his grandchildren at his waterside estate near Annapolis, Maryland?

Mr. Brock said he was running because he knew the issues and could have more influence than he did now as a member of several volunteer organizations. "I just decided that I could make a difference, that I am truly, deeply worried about the direction of this country," he said. (NYT)

Quote/Unquote

Gary Suo, a high school teacher in Wisconsin, on the Whitewater issue: "I think Bill Clinton is doing one helluva job and he deserves our support. He's taking on the tough issues and I definitely think he's getting a bum rap. I think the press is doing a terrible job of covering it." (WP)

Away From Politics

● A convict who volunteered to be executed was put to death by lethal injection in Texas. Richard Lee Beavers, 38, who was convicted of kidnapping and murdering a Houston restaurant manager and raping the manager's wife in 1986, was pronounced dead about eight minutes after state officials began the flow of lethal drugs into tubes attached to his arms. He was put to death at the state prison at Huntsville, north of Houston, state officials said. He became the third man executed in Texas this year.

● Fire gutted an amusement park ride in El Paso, Texas, seriously burning four passengers, three of them children. Nine persons, including a fire fighter, were injured in the blaze at Western Playland. No buildings were damaged other than the Gold Nugget, a thrill ride through what is designed to look like an abandoned gold mine.

● The Menendez estate has dwindled to a little more than \$2 million and owes more than its

assets, according to court records. Jose and Kitty Menendez were estimated to have been worth \$14.5 million when they were killed in their Beverly Hills, California, home by their sons, Erik and Lyle, in 1989. Records show that after the slayings the estate took several huge losses, including \$1.8 million from selling furniture and bonds, \$1.2 million in the sale of the home, and \$531,000 in a stock sale.

● The countdown has begun for the launching of the shuttle Endeavour. The nine-day flight, beginning Thursday, is part of NASA's Mission to Planet Earth, an ongoing program to study the planet from space. The crew will take pictures from above the Amazon River, the Andes, the Alps, Patagonia, the Galapagos Islands, the Sahara, Death Valley and other sites. Meanwhile, Earth will be scanned by what NASA says is the most sophisticated radar ever sent into space for environmental purposes. (Reuters, AP)

In New Texas, Computers Fuel the Rebound

By Sue Anne Pressley

Washington Post Service

SUGAR LAND, Texas — After 15 years of booms and busts and painful recovery, a new Texas is taking shape in the former cotton fields of Fort Bend County. This time, the emphasis is suits instead of boots.

Texans here live in big brick houses, surrounded by artificial lakes and pampered pansy beds and mechanical graders working daily to convert still more fields to tidy residential parcels. They have high-paying jobs, lots of children and 14 golf courses. Many of these Texans used to be Californians.

If the fortunes of Texas in the 1970s and '80s were chronicled through the ups and downs of

Houston, the Texas of the '90s is perhaps best explained through the explosive growth and emerging character of Fort Bend County.

Population surveys place this county of nearly 250,000 people third among the nation's fastest-growing white-collar addresses, and its rapid development reflects a trend that is likely to make Texas stronger, if more predictable, in years to come.

Some things will never be the same in this big, bluff state. There were the glory years, when oil reigned, men with calluses on their palms and working-class origins commanded fat paychecks, and the future of a shrewd Texan seemed limitless.

Then came the lean years of the

'80s, when the freakish combination of an oil bust, a real estate crash and a second oil bust devastated many a spirit and bank account in just five years.

In what some might view as typical Texas fashion, however, the state economy has made a smart rebound, shifting from oil, natural gas, cotton and cattle to the more sober and perhaps more stable endeavors of the future, the computer and service industries.

And, in a fortuitous twist, the state's highly publicized fall contributed nicely to its resurgence. Because of its earlier troubles, the cost of doing business in Texas has been considerably lower than the national average, a fact employed successfully by state and local offi-

cials working overtime to sell the state's outsized virtues.

The results have been convincing. Much of the rest of the nation is still recovering from the 1990-91 recession that Texas never experienced. Each year since 1990, Texas has been the fastest growing of the 10 most populous states, both in people and jobs. In a recent 12-month period it gained 180,000 jobs, as many as California lost.

Last week, demographers with the U.S. Census Bureau predicted that sometime this year, Texas (pop. 18,031,484) will outstrip New York (pop. 18,197,154) to become the nation's second most populous state behind California.

But every gain has its price. As Texas shifts from its long dependence on natural resources to a new focus on human resources — and the business, health and recreation services they can provide — the state that has always prided itself on its uniqueness is not so different anymore.

"Texas now looks like the rest of the country so much more than we ever did before," said Jared Hazleton, director of the Center for Business and Economic Analysis at Texas A&M University and author of a monthly newsletter on the state economy.

"We're unique, maybe, because we're a younger and growing population, more ethnic," he said. "But if you look at our economy, can you

really tell when you leave Dallas and go to Los Angeles? We like to think of ourselves as different. We cling to those myths. But I think, by and large, they are gone."

Of course, any attempt to define, or redefine, the Texas economy collides with the fact that Texas is really not one state but five or six.

For every Austin, now ranked second behind California's Silicon Valley in the number of computer-related jobs, there is a Midland. In that West Texas city, the quintessential oil town with its Petroleum Museum and the place where a young George Bush got his start as a wildcatter four decades ago, the job-growth rate last year was a scant three-tenths of 1 percent. At the same time, Austin registered a growth rate of 6.3 percent, well above the national average of 1.5.

The rise of Fort Bend County does not necessarily portend the decline of Houston, the nation's fourth largest city with 1.6 million people. But after the pounding of the '80s, Houston has had a long road to travel. Job growth lagged slightly behind the national rate last year, and a medical center — not the petroleum industry — is now Houston's largest employer.

But as the promotional Greater Houston Partnership is quick to point out, the city still reigns as the energy capital of the United States, home to more than 3,000 energy-related companies.

Billy Hendon, one the three American fact-finders being expelled by Vietnam, at his Hanoi hotel.

Hanoi to Expel 3 MIA Fact-Finders

The Associated Press

HANOI — Three Americans seeking evidence of their countrymen held prisoner after the Vietnam War have been denied access to an alleged underground prison and must leave the country, Vietnamese officials said Monday.

The officials said the three insisted on visiting a sensitive military installation in Vinh Phu Province, 60 miles (100 kilometers) northwest of Hanoi, that is off-limits to foreigners. The officials said the three must leave because their visas were expiring.

The Americans are Billy Hendon, a former U.S. congressman from North Carolina; Beth Stewart, a Washington attorney and

daughter of an American pilot shot down during the war; and Lamont Gaston, head of a veterans organization. They had asked to enter the site during a fact-finding trip that began March 20.

Miss Stewart is chairwoman of the POW Publicity Fund of Washington, and Mr. Hendon is a consultant for the organization. Mr. Gaston is national president of VietNow, a group based in Rockford, Illinois.

Mr. Hendon said U.S. officials responsible for investigating cases of missing American servicemen were overlooking Vietnamese prisoners as a potential source of clues. "They go and dig around the

airplane wrecks," Mr. Hendon said. "Why don't they go around the prisons and interview the witnesses?"

The commander of the U.S. MIA office in Vietnam, Lieutenant Colonel John Cray, said Mr. Hendon had not contacted him during his visit. But Colonel Cray said his task force had investigated a number of Vietnamese prisoners, one as recently as last month, for signs of missing Americans.

"The U.S. government looks at every piece of evidence that comes in, regardless of the source," Colonel Cray said. So far, he said, his unit has found no proof that Americans were imprisoned in Vietnam after the war.

TECHNICAL WRITING

The Smart Career Move of the 90's

Now in its fourth year, the Technical Writing Program of The American University of Paris has successfully prepared documentation specialists for rewarding careers in software and telecommunications worldwide.

Call to reserve a place at a free information session:

Tel. (1) 47 20 44 99

The Program:

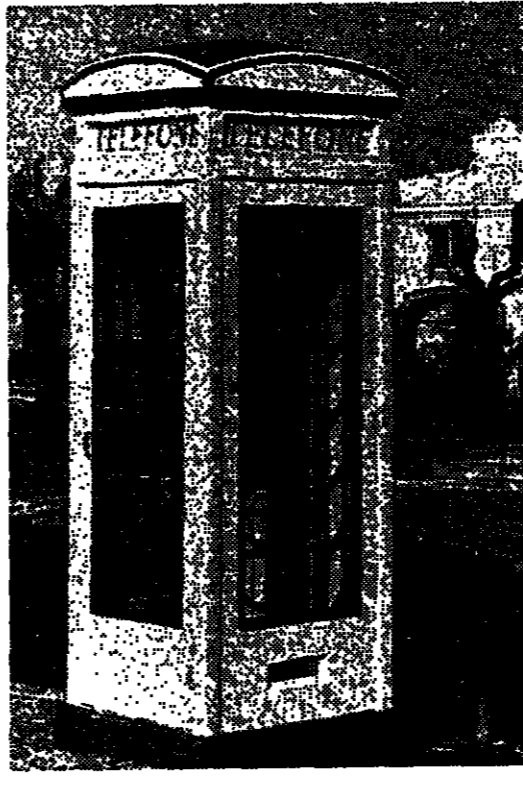

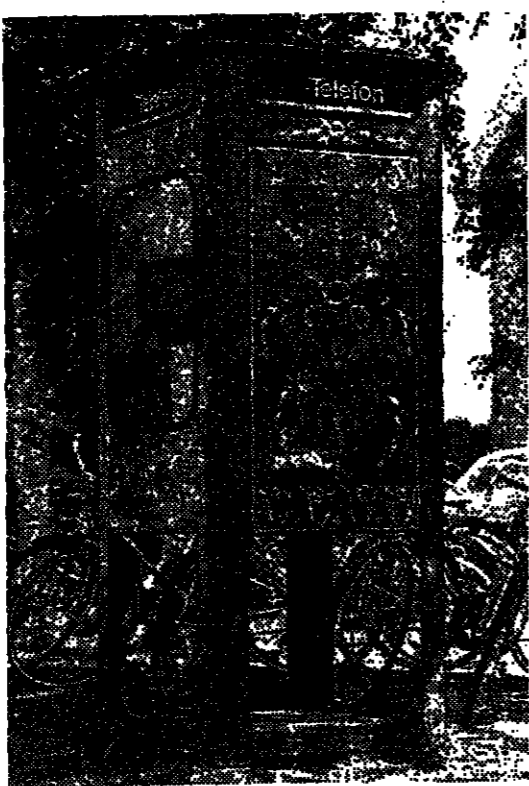

- 8 months
- part-time evening classes
- taught in English
- job placement assistance

Dublin's Reynolds: Staying Afloat in a Sea of Troubles

By James F. Clarity
New York Times Service

DUBLIN — When historians evaluate this period in Ireland, supporters of Prime Minister Albert Reynolds hope that he will be praised as the leader who brought peace to the island after 700 years of intermittent war.

But if he fails in his effort to end the current phase of that war — the 25 years of killing in the British province of Northern Ireland — he could be relegated to a footnote: a pet-food manufacturer and dance hall impresario who was known to dress in a cowboy suit and sing a Jim Reeves country-western howler that begins: "Put your sweet lips a little closer to the phone."

Mr. Reynolds, 61, said in a recent interview that he was no more ashamed of that than Bill Clinton was of playing the saxophone.

He acknowledged the similarity to another American president, Harry S. Truman — when reminded that his detractors had said that the job of running this country of 3.5 million people would be too much for him.

"There were those who said he doesn't know about Northern Ireland, he doesn't have a grasp of it," Mr. Reynolds said. "Those were proved wrong."

Although peace is still far from assured, the peace efforts of Mr. Reynolds and Prime Minister John Major of Britain are still alive.

Mr. Reynolds is widely credited with having helped nudge the Irish Republican Army toward a more moderate course. The IRA an-

nounced on Wednesday that it would observe a 72-hour cease-fire in Northern Ireland this week.

At a ceremony in Belfast on Sunday celebrating the 78th anniversary of the Easter Rising, Gerry Adams, head of Sinn Féin, the IRA's political wing, said that the cease-fire could lead to peace if Mr. Major used it to talk to Sinn Féin.

Mr. Reynolds is struggling with a troubled economy and one of the highest unemployment rates in the European Union, about 19 percent. But he defends his government.

"This is the most stable government Ireland has had for years," he said, referring to the coalition partnership between his Fianna Fáil and the Labor Party. Together, they have a margin of 37 votes in the 166-seat lower house of parliament, the largest in Ireland's 72 years of independence.

Mr. Reynolds, who had been finance minister, became prime minister in February 1992 after a struggle in which the popular Charles J. Haughey was pushed out of the party leadership. He was immediately hit with an international scandal. A pregnant 14-year-old said she had been raped by the father of a friend wanted to have an abortion in Britain. Abortion is outlawed in Ireland.

In this overwhelmingly Roman Catholic country, Mr. Reynolds was caught between groups demanding further liberalization and those opposed to abortion. He is a practicing Catholic and had never been known as a liberal, and his advisers told him to leave the issue to the courts. But he put the question to a referendum in June 1992, and it established the right of women to abort information and to travel abroad for abortions.

On the same day, Irish voters approved the Treaty of European Union, giving it a fillip just when it seemed to be in trouble elsewhere in Europe.

At the end of the year, he called for a general election in which his party did poorly, and his career at the top seemed finished. But he turned the defeat into victory, bargaining with Labor to keep the prime minister's job and power

MASKED MESSENGER — A member of the Irish Republican Army reading a statement at an Easter ceremony in a cemetery in the border town of Crossmaglen, Northern Ireland. The IRA has called a unilateral 72-hour cease-fire beginning at midnight Tuesday.

ful cabinet posts for his party.

Last April, he began the new peace initiative by carrying secret proposals to Mr. Major from Mr. Adams and John Hume, the most influential moderate Catholic leader in the North. The proposals came to him through Mr. Hume, a friend. Since then he has been a negotiator between Sinn Féin and London, and both sides have praised him.

A native of the Irish midlands, he went to a college in County Sligo, then into the pet-food business, which is still being operated by one of his seven children. He ran for parliament and worked his way up within the system.

As he has in his political life, he has made changes in his personal life. A chain smoker, he quit. He gave up his soft-drink habit when he learned he was a diabetic and now consumes dozens of cups of tea daily and swims whenever he

can. And while he can no longer be persuaded to sing in public, he will on request recite a poem.

He has promised to take on the issue of divorce with a referendum next fall, another issue so sticky that his critics say it will divide the country and result in his defeat. He has made it clear to the country's powerful bishops that he will not bow to their pressure in all matters.

Since he has been prime minister, the parliament has liberalized laws on the distribution of condoms and has decriminalized homosexuality. "He has done extremely well," said Tim Pat Coogan, a historian and author of a standard work on the IRA who had criticized Mr. Reynolds for not being knowledgeable enough about the North.

"In a way, it's like Nixon and China," Mr. Coogan continued, referring to the peace effort. "He may be the only one people and politicians can trust to get the job done."

Malaysia-Thailand Exercise

The Associated Press

KUALA LUMPUR — The navies and marine police units of Malaysia and Thailand began a five-day joint training exercise Monday to help iron out communications difficulties. About 300 men and eight vessels, four from each country, are joining in the exercise in waters off Langkawi Island in Malaysia and Satun and Phuket Islands in Thailand.

INTERNATIONAL EDUCATION: SPECIAL DIRECTORY

RHODE ISLAND SCHOOL OF DESIGN

In New England, art imitates life.

Located in southern New England, Rhode Island offers some of the finest beaches on the East Coast of the United States, beautifully preserved colonial villages and the cultural richness of Providence and Newport. But if those don't convince you to study here this summer, maybe these will: the Rhode Island School of Design's 1994 Summer Art and Design Programs.

Summer Studies Program For art students, artists and art educators with a full selection of intensive college credit courses.

Pre-College Program For high school juniors and seniors, fine art and design courses with a choice of studio concentration.

M.A. in Art Education For practicing art teachers (K-12), three-year summer residency program.

RISD Study Travel Programs Architecture and art in Rome, graphic design in Switzerland and fine arts in France.

For a free catalog of RISD summer programs, call 24 hours: (local international access code) 1-401-454-6200, or fax coupon: (local international access code) 1-401-454-6218 or mail coupon to: RISD, Continuing Education, 2 College Street, Providence, RI, USA 02903-2787.

ADVERTISING SECTION

The most up-to-date studies can be pursued in the peaceful environs of some of Scandinavia's most venerable institutions.

This advertising section was produced in its entirety by the supplements division of the International Herald Tribune's advertising department. • It was written by Nicholas George, a free-lance writer working in Stockholm.

AN EXPANDING RANGE OF SPECIALIZED COURSES

Scandinavia's growing number of foreign students testifies to the region's ability to provide international education in some of Europe's most prestigious academic institutions.

In the last year alone, Sweden has seen the number of foreign students arriving through the European ERASMUS program double, from 1,000 to well over 2,000.

With English-language programs in subjects ranging from Arctic studies to electrical engineering, courses have been developed that attract both exchange and full-time students.

At the forefront of such internationalization is the Stockholm School of Economics. Starting in January next year, foreign students who have gained a BA or BS from other countries will be able to enroll to complete an MS at the school.

In other fields, however, the SSE has already established itself as a leader in Europe. The European Institute of Japanese Studies (EJIS) was established in 1992 and is committed to research and education in the Japanese and East Asian economic and business environments. With the backing of the Swedish government, major Swedish business corporations and some 150 Japanese corporations and individuals, EJIS offers excellent resources.

"The goal of our institute is to offer current and future European and Japanese policymakers and corporate leaders the means to learn more from and about each other," says Professor Jean-Pierre Lehmann, director of EJIS.

The SSE is also a member of the Community of European Management Schools (CEMS), an organization comprising 12 selected academic institutions across Europe. In Norway, the institution participating in the CEMS exchange program is

the Norwegian School of Economics and Business Administration in Bergen. Being selected to take part in the scheme is in itself a mark of the school's high standards, says John Anderson, director of the school's international office.

CEMS exchange students will be involved in the school's MIB program, which is taught in English. The MIB course at present has 30 students, is three semesters long and covers the major aspects of international business, as well as some

Arctic studies and Finnish mythology are some offerings

areas — such as shipping economics — with particular relevance to Norway.

Indeed, in many aspects of management and business teaching, Scandinavia has something special to contribute. The Norwegian School of Management, BI, offers both MBA and MS programs in English. The MBA is a one-year, full-time course, while the MS lasts two years and allows students to specialize in energy management, finance and economics, international marketing and the strategy or European management.

"The MBA tries to focus on Scandinavian leadership techniques, the reliance on teamwork and the use of flat organizational structures, things which can still be a little unusual for people from other countries," says Oyvind Bohren, dean of BI's graduate program.

These techniques, although well-established in Scandinavia, had not been previously taught in English. This was a big barrier in preventing the ideas from getting across, he adds.

With Finland, Sweden and Norway having applied to join Denmark in the European Union, future student-exchange programs organized by the Union should be facilitated. These countries' plans to enter the EU have also been reflected by a growing number of courses on European matters.

Starting in September, Lund University will offer a new one-year masters program in European affairs. The program's goal is to provide an advanced knowledge of the legal, economic and political aspects of European affairs.

Other new masters programs at Lund include one in public international law. The course, which runs for two semesters, aims to give a sound knowledge of public international law in general and of human rights and humanitarian law in particular.

The university's Department of Sociology also has a new masters program called "Rural Development: Society, Population and Environment."

Lund University, situated in the center of the picturesque old city of the same name, is the largest single establishment for research and higher education in Scandinavia.

On a smaller scale, Vaxjo University in central Sweden has a student population of around 6,000. Even here, an active exchange policy is pursued, involving more than 250 overseas students every year.

The university offers nine English-language programs, ranging from an MBA run in cooperation with the University of Hertfordshire in England to a doctoral course in entrepreneurship.

"It's not too big. With around 6,000 students, you can get to know people, even those that aren't in your course," says Vaxjo University's Jerker Persson.

This year marks a significant change in Sweden's educational system with the privatization of two institutions of higher education, Chalmers Institute of Technology and Jonkoping University.

The actual transfer of the Jonkoping University to the private sector will take place in July. This will also herald an expansion in the economics and business-administration department, which will become known as the Jonkoping International Business School. Student numbers will increase from 600 to 1,600, with the faculty being upgraded to allow the granting of PhDs.

Jonkoping's director, Charlie Karlsson, says privatization will give the institution more freedom to provide the kind of courses students are demanding.

In Finland, the Center for International Mobility (CIMO) is the central body that coordinates international studies and provides concise information on 140 English-language programs at the nation's universities and colleges.

Some of these courses are unique, according to

CIMO's communications manager, Merja Lankinen. One is the program in Arctic studies offered by the Arctic Center, itself part of the University of Lapland in the north of the country.

Among the newest programs available is bioenergy studies at the University of Joensuu in eastern Finland. The new international program is designed to carry out in-depth analysis of the use of biofuels as a future source of energy to replace nuclear and fossil fuels.

The country has taken internationalization to heart, as

Ms. Lankinen explains: "Even the polytechnics in Finland give international programs, for example in hotel, restaurant and tourism management."

The country's largest academic institution, however, remains Helsinki University. With 30,000 students, more than 1,000 of them from abroad, it is one of the largest universities in the Nordic countries.

Twenty-seven programs are offered in English, ranging from postgraduate courses in molecular genetics to Finnish mythology.

SUMMER EVENTS IN SCANDINAVIA

Scandinavia comes alive in the summer, when people are eager to take advantage of the long warm days before winter sets in again. With so many Scandinavian institutes, colleges and universities offering summer courses, the opportunities for combining study and pleasure are endless. The following is a selected list of some of these events.

Denmark
Copenhagen House Festival, June 8-15
Rock Festival, June 15-17
Large rock festival, June 30-July 2

Education in Scandinavia

ENGLISH-LANGUAGE INSTRUCTION IS REGION'S MAJOR DRAWING CARD

For 99 percent of Sweden's international companies, the corporate language is English, says Holger Formgren, of IHM Management Center. In other cultures, this might be considered a drawback, or even a threat. Yet for Scandinavians, the use of English is deep-rooted, and the region provides some of the best English-language study programs available. For Mr. Formgren, this means teaching Scandinavian business techniques to foreign managers of Swedish companies or to those who have regular dealings with Scandinavian companies and want better insight into how they oper-

ate. This summer, for the first time in Stockholm, IHM will be offering marketing programs for senior marketing managers in English. According to Mr. Formgren, world business is becoming increasingly aware of the strengths of Scandinavian management methods. "If you look at many of the Japanese companies today, they have problems," he says. "Now, it is Japanese managers who come here to learn the Scandinavian style of management."

The value of Scandinavian business techniques is being increasingly recognized, and they are now being taught in English.

Business is not the only area in which internationalization has made the English language indispensable. Finland's Vaasa Institute of Technology set up degree courses taught in English in architecture, electrical and electronic engineering, and mechanical and production engineering back in 1991. The aim was partly to create European and international awareness, but also to give students a strong grounding in fields where English is vital to professional mobility and increasingly important for good career prospects. All the de-

gree programs include practical experience, and the institute aims to ensure that part of that experience is gained abroad. At present, almost a third of the students in the program come from outside Finland. The ease with which foreign students can communicate with their colleagues and hosts also helps prevent them from becoming isolated. Whether it is a question of dealing with academia, handling a transaction in the local bank or simply asking for directions, English is the only language they need to know.

Björn Axelsson, associate professor in business administration at Uppsala University, says that these factors

some understanding of their surroundings but have no extra time for language studies. Although Scandinavia is better known for its sun, courses held in the summer months allow students to study while enjoying some of Europe's most spectacular and unspoiled countryside.

Among the most interesting programs being offered this year are those by the University of Gothenburg on Sweden's west coast. Short courses and workshops in various fields have been running for the past three years, with a set of art courses being added this year.

According to Gunnar Sjöström, dean of the faculty of fine and applied arts, "Gothenburg University has a higher amount and variation of education in the fine and applied arts than any other university in Northern Europe."

This year's courses include a composition program to be taught by composers from Scandinavia and Britain, an International Organ Academy and one entitled "The Healthy Voice," headed by an American professor, Oren Brown.

In the visual arts, the School of Photography is running a workshop with the renowned American freelance photographer Mary Ellen Mark, while the School of Design and Crafts offers an experimental workshop in wood.

In Scandinavia, English-language education can start much earlier than university studies. The growing use of the International Baccalaureate, or the IB, in schools throughout the region allows the standardization of international high-school education. The IB qualifies candidates for admission to universities and colleges worldwide.

Leif Bernström, director of Copenhagen International School, is also chairman of the Heads Standing Conference of IB, an organization that now includes 520 schools in 71 different countries. It is his opinion that international curricula will soon be established for younger pupils as well.

With 425 pupils from 45 different countries attending

the Copenhagen International School, the atmosphere is something special. The school's move to a new site in Hellerup in the north of the city has proved a great success.

Claes Goran Widlund, principal of the International School of Stockholm, also emphasizes the flexibility of the IB program. "With the IB, you can start your studies in Stockholm and finish in New York or London," he points out.

Nowadays, it is not just in the capital cities that such services are provided. The Hvitefeldtska Gymnasium in Gothenburg, a state-funded school, has around 100 students in the IB course.

The course was set up to cater to children who had completed much of their education abroad. In a city that is home to many multinational companies as well as a large university, this was a common situation — one that English-language tuition and the IB program have been able to address.

In Norway, the Skagerak Gymnasium offers the IB course as well as Norwegian qualifications. Headmistress Elizabeth Elvén explains that even for Norwegians going on to further education in Norway, being taught in English is a real advantage. Once students start attending colleges and universities, they find many texts are only available in English, she says.

In Finland, Mattlidens Gymnasium, 12 kilometers west of the center of Helsinki, is a member of the European Council for International Schools. Around 45 of its 350 students are now in the IB program.

Other English-language schools offer different approaches. The British School of Stockholm mainly follows the British national curriculum, while in Denmark, the Bernadotte School stresses an English-language education based on the "pedagogical principles of the host country."

Communication between East and West is being facilitated by new curricula and exchange programs.

GATEWAY TO STUDIES IN EASTERN EUROPE

Geography and history have put Scandinavia's universities and colleges in a unique position to offer a gateway to studies and trade in Russia and the Baltic republics.

In fact, many of these links were established long before the collapse of the Communist regimes in Eastern Europe, although the opening of borders and minds has allowed the flow of ideas and students to multiply.

These links have proved so successful that the Stockholm School of Economics is setting up a sister institution in the Latvian capital of Riga. The scheme has been financed by the Latvian and Swedish governments and by a grant from the Soros Foundation. It will start taking students in July this year.

"Eventually, we will send our exchange students there for a week or so if they wish," says the president of SSE, Professor Staffan Burénstam Linder.

Sweden is not alone in

taking an interest in the expanding markets to the east. In Denmark, the Niels Brock Copenhagen Business College has established courses to attract students from the Baltic states as well from St. Petersburg, Poland, Ukraine and Uzbekistan.

"We became involved following a request from the Danish Chamber of Commerce in 1990," says Birde Berg, head of Niels Brock's international section. The expertise gathered since then has enabled the college to set up a business college in the Estonian capital of Tallin, with more than 100 students.

Now a new college is being set up in Riga. Students who have reached the ninth grade will be able to pursue their studies here for an International Business Baccalaureate.

Mrs. Berg says the aim in both cases is also to train teachers so that the availability of such courses increases. It is hoped that three other centers will be established in Estonia, with five more planned for Latvia.

In Finland, many institutions have had long-term links with the east. Lappeenranta University of Technology is for the second year offering a summer program in international business. "It was a big success last summer," explains Helena Salo, director of the university's international office. "Students found it especially useful in the field of East-West trade, and enjoyed the study tours to Russia and the Baltic states."

Further north, the University of Joensuu also provides excellent programs on Eastern Europe. According to Joensuu's international department, one of the university's most popular courses is entitled "Karelia, the

Baltic Area and Eastern Europe."

Situated in Finnish Karelia near the Russian border, Joensuu has experienced the region's complex history. The one-year interdisciplinary study program includes courses in geography, history and Finno-Baltic languages as well as an international student-exchange program with Petrozavodsk State University in neighboring Russian Karelia.

The university has close links with the University of Tartu in Estonia and with universities in St. Petersburg and Moscow. These links also offer opportunities for those taking another one-year program: Russian language and culture studies.

Take advantage of Finnish higher education

The overall standard of education in Finland is extremely high. We have one of the densest networks of higher education institutes in Europe.

All of our 21 universities offer a number of study programs that can be taken entirely in English. You can also choose one of the 22 polytechnics.

Why not get acquainted! CIMO is your link to higher education in Finland. Get in touch with us! We'll be glad to send you further details about studying in Finland.

Closer to the Real Business World

Study at Jönköping International Business School. Type of charge. We offer students management studies at advanced undergraduate level with special emphasis on small and medium-sized enterprises.

To provide international students with variety and choice, 11 courses taught in English are available, for example: Entrepreneurship and Enterprise Formation, SME Management and Business Development, Management Control Systems, Strategic Management, and European Company Law.

Students who stay the full academic year can obtain a Bachelor's or Master's Degree in Entrepreneurship, Marketing or Accounting.

For further information and application forms: Mr Johan Wiklund, E-Mail Johan.Wiklund@ekon.hj.se, or Mr Johan Thor, E-Mail Johan.Thor@ekon.hj.se.
